WORK EXPERIENCE

Inform Software SpA

2023 – Present

Frontend Software Engineer

Santiago, Chile

- Front-end engineer responsible for reworking legacy systems and building modern web-based solutions. Developed logistics web applications and created UI frameworks, internal tools, and performance improvements to support complex business logic and data-intensive workflows.
 - Primarily focused on React front-end development, while also contributing to backend by extending Java (Spring) services and maintaining Docker environments. Conducted C++ and Delphi code analysis to understand legacy components.
 - Worked within a large, international company, collaborating across cultures and three languages (en/es/de) in an environment that demanded high engineering standards, thorough testing, documentation, and scalable design.
 - **Stack:** TypeScript, React, Next, Java, GraphQL, Keycloak.

CampusHR

2019 – 2022

Full-stack Lead Developer & Architect

Santiago, Chile

- Led the design and development of an HR SaaS platform. Implemented solutions for payroll, vacation, and file management, climate surveys and other employee information and tools.
 - Implemented local Chilean labor regulations directly into the software logic to ensure legal compliance.
 - Managed a cross-functional team of QA engineers and both senior and junior developers.
 - Defined business rules, participated in sales meetings, and provided technical support for clients.
 - **Achievements:**
 - Led a cross-functional development team.
 - Built a flexible DSL-based calculator for formularized payroll items.
 - Architected event-driven systems for processing large payroll batches.
 - **Stack:** JavaScript, React, Sequelize, Prisma, Tailwind, GraphQL, Docker.

CampusChile

2016 – 2022

Head of Technology

Santiago, Chile

- Oversaw all technical aspects of a growing e-learning provider, from software and infrastructure to digital content production. My role combined full-stack development, system administration, and creative technology work.
 - Managed Moodle-based platforms for corporate clients, including setup, hosting, and customization (plugins, themes, and integrations).
 - Developed dashboards, landing pages, and web tools for sales support and training delivery.
 - Directed the production of interactive educational content: wrote scripts, filmed and edited course videos, led a team of designers to create multimedia learning modules.
 - Maintained Ubuntu servers and DigitalOcean PaaS environments.
 - Led a small multidisciplinary team, collaborating closely with Sales and leadership.

Sigma Construcciones LTDA

2015

Developer Intern

Santiago, Chile

- Developed a web-based meeting management tool for the company intranet.
 - **Stack:** PHP, Javascript, jQuery, HTML, CSS, SQL.

EDUCATION

Pontifical Catholic University of Chile

B.S. in Computer Science Engineering

Graduated 2022

Santiago, Chile
